## DETAILED ACTION

### ***Terminal Disclaimer***

1. The terminal disclaimer filed on 10-03-2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 10/619,956 has been reviewed and is NOT accepted.

The application/patent being disclaimed has been improperly identified since the number used to identify the application being disclaimed is incorrect. The correct number is 10/619,596 (not 10/619,956 as stated in the terminal disclaimer).

### ***Drawings***

2. The drawings were received on 10-03-2005. These drawings are acceptable.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-11, 13-24 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11, 13-28 of copending Application No. 10/619,596. Although the conflicting claims are not identical,

they are not patentably distinct from each other because both of them are directed to the same subject matter. The claims of the copending application No. 10/619,596 further disclose the peripheral side of the second substrate. A substrate is a 3-dimension structure, therefore it must have a peripheral side.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

#### ***Response to Arguments***

5. Applicant's arguments filed 10-3-2005 have been fully considered but they are not persuasive.

The applicants argue that the terminal disclaimer, with fee authorization is sufficient to overcome the obviousness-type double patenting rejection over application's copending application. The argument is not persuasive. The terminal disclaimer is improper because applicants identify the incorrect application number (See discussion above). The correct number should be 10/619,596 (not 10/619,956 as stated in the terminal disclaimer). Since the terminal disclaimer is improper, therefore the examiner still maintains the obviousness-type double patent rejection over applicant's copending application number 10/619,596.

#### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1765

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
